STANDARD TICKET TEMPLATES

You can use these ticket outlines to draw paste and assemble you ticket design onto if you wish. You can use the type examples (right) to layout your ticket information onto your design or even trace them through on tracing paper. Another approach may be to cut out the ticket shape and use it as mask frames you design.

EXAMPLE TEXT & TYPE

Here are examples of typefaces that you may want to use. Which typefaces will appeal to your target market and why? Will the type be readable to the bus driver to check? What other information do you need on your ticket?
